The histogram displays the frequency of average followers gained per video across different viewer ranges. The x-axis represents the average number of viewers in thousands (0K to 150K), and the y-axis represents the average number of followers gained in millions (0M to 4M). The data shows a high concentration of videos in the 0K-10K viewer range, with a significant peak in the 10K-20K range. There are also notable peaks in the 30K-40K and 50K-60K ranges, indicating that a small number of videos can attract a large number of followers.
